

Product Information:

EcovaPure™ DYP is a proprietary formulation of egg yolk protein, also known as defatted or decholesterolized egg yolk powder. It is available as full proteins or hydrolyzed peptides.

DYP is a great source of protein to enrich food products, due to its excellent amino acid profile. Of all protein sources, egg yolk protein best matches the body's nutritional requirements. It is most often used as a functional food or beverage fortifier with applications in sports nutrition.

Product Applications:

Cosmetic Uses:

- Peptides contain vital amino acids necessary for your skin cells to function and look healthy.
- They help the skin to repair itself, leading to younger looking skin.
- Peptides are an excellent ingredient which can be used in all facial creams, lotions, and serums, as well as wrinkle treatments.

Food Industry Applications:

- Defatted egg yolk protein is an excellent source of protein with little fat content.

Product Specifications:

To order the peptide version, specify DYPP

Company Profile:

Ecovatec Solutions Inc. is a private Canadian based egg yolk processing company focused on innovative technology solutions. We are dedicated to delivering premium egg yolk ingredients to the nutraceutical, pharmaceutical, cosmetic, and food industries.

Our EcovaPure™ processing methods illustrate our commitment to purity, efficiency, and natural processing. EcovaPure™ technology uses low temperatures and no harmful chemicals to extract and separate high quality, functional food ingredients. We work with local egg producers to ensure Canadian Food Inspection Agency approved pasteurized yolk is the basis of all our products.
